CHICAGO, March II.—[Exclusive Dispatch.] Regarding the indictment against the National Packing Company and its ten subsidiary concerns by a Federal grand jury today and the subsequent action by the government in filing a bill in equity for the dissolution of the National, the packers prefess to be well satisfied—in fact, very much pleased. They aver that this action by the government, if carried out, really removes one of their greatest problems and accomplishes what they, themselves, did not dare to do.

The accusations in the civil suit, charging individuals with law breaking, price fixing, conspiracy, fake bookkeeping, stock juggling and other mindeds are strikingly detailed and vig-

orous.

They are absent from the criminal indictment, which consists simply of a statement of facts, which are freely admitted by the packers, that certain companies, once competitive, are new jointly operated by the National Packing Company, and therefore do not now compete.

GOVERNMENT CONFIDENT.

The government is confident that it has thus dealt a body blow to lilegal combinations in the packing industry and has set in operation forces which will give the consumer meat for lower prices and the stock raiser a higher price for his product.

one of their greatest problems has been found for them by the government. But they are also of the opinion that the prices of live stock will go down and that the prices of meat will go up they be reason.

While the "stating part" of the bill s a severe condemnation, the "prayer for relief," which decides what the effect of the bill is to be, asks that they be prohibited from operating the National Packing Company and its

they will probably go into court and submit to an injunction, close down the score of plants of the National's subsidiary companies, and leave the business to tall into the hands of Armour, Swift and Morris.

The National Packing Company has been but a clumsy means, they say, of eliminating the competition of these once independent companies, and nothing like as efficient or economical as their destruction, a measure which they dared not undertake. The packers and prosecutors are thus both well satisfied.

in which he called the insurgents who
voted against the Burieson resolution
a lot of 'cowardly membera,' was but
the vaporings of an old man's mind,"
declared Representative Norris of Nebraska, today.

when I voted to retain Cannon in the chair. Events I believe, will justify me,"

It was suggested to Mr. Norris if the Republican caucus should name six men dominated by Speaker Cannon, the new Rules Committee scarcely would differ from the old one and the insurgent's victory on the rules question would be practically villated.

"The victory may not show so much in the present Congress," answered Mr. Norris, "but in the years to come it will be in evidence, We have taken the Speaker himself from the Rules Committee and have taken the speaker himself from the Rules of the other members out of his hands. The members of that committee hereafter will not be under the elighteet obligation to the Speaker, but will be responsible to the House alone for their appointment.

"Also the House can change the Rules Committee if it does not obey the wishes of the House."

Mr. Norris vigorously denounced the attitude assumed by the Speaker toward the "insurgents" since the vote Saturday.

"It all depends on hiw the Republican majority, conducts itself toward the "insurgents" since the vote Saturday.

"It all depends on hiw the Republican majority, conducts itself toward the "insurgents" since the vote Saturday.

menal; today's bargains are even more attractive.

Our rancy goods buyer, who has just returned from New York, brings most gratifying news for the women folks of Los Angeles. This is the story:

He found an importer in New York who deals exclusively in laces, trimmings, embroideries, veilings, ribbons, fancy goods and notions. He was in need of money to liquidate overdue bills. Our buyer went carefully through his stock and offered spot cash for numerous lots of his best merchandise, providing that he would sell at 50c on the dollar. Twas a big deal and entailing an outlay of close on to \$40,000. After negotiating for several days the deal was closed at an entailing to the deal was closed at the second of the second several days, the deal was closed at our figure, and most of the goods are now in our pos-session. These will be featured, commencing Monday, in a series of sensational sales, unprecedented in the annals of Los Angeles merchandising. Every article is new, crisp, fresh and up-to-date. Every price quotation authoritative, and every reduction genuine. First choosing will be best, so a prompt response is advisable. Monday's business was pheUp to \$1.50 Embroideries Very Fine-Widths Up to 30 Inches

(BT DIRECT WIRE TO THE TIMES.) WASHINGTON, March 21.—[Exclusive Dispatch.] Congressman Needham is trying hard to secure for the grape and wine growers of California cohcessions from Canada, similar to those axtended to French growers. He has appealed to President Taft and to the tariff Board. Only ten days remain for favorable action and while the claim is made that the concession asked would require an order in Council, Needham is sparing no effort to obtain the desired results.

Most cases of St. Vitus' dance may be quickly cured if taken in time. If neglect-

the country. We certainly would not run the railroads."

At the conclusion of Mr. Elkins's speech, Senator Bacon of Georgia charged the West Virginia Senator with having neglected to give attention to the provision of the bill authorizing any railroad company to acquire the line of another company in which it may own all per cent. of the stock.

CLASHES WITH SHERMAN ACT. He said that the law would have the effect of nullifying the Sherman law as construed by the Supreme Court, and to legalize all existing ownerships of one road by a competing line. This, he asserted, was the real purpose of the measure, and, he added, it was his conviction that the railroads would be willing to surrender much in order to get this concession.

Mr. Elkins would not concede the mittee on Public Lands.

Lamb awaited the coming home of
Mike Shuits this morning from the
smelter, accosted him, and a moment
later, pulled his gun and shot him
through the abdomen. Shuits ran forty
reds, Lamb following, and shooting
him twice again through the back. Any
one of the three shots would have been
fatal.
Shuits fell face forward, Lamb then
approached the dead body and fired
another shot through the head. The
tragedy was witnessed by two Mexicans. TASSOCIATED PRESS NIGHT REPORT.1

cans.

Lamb came into this city from Pirtleville, near the scene of the shooting, and gave himself up to Deputy Sheriff Bob Hilburn.

Lamb's wife, four years ago, awaited the return home of a neighbor, also a smelter employé, and by the light of his bitycle lamp, shot him dead. She was scenitted.

Oregon Woman Succumbs to Blood

The steady nerves of the influential, successful, wellliked individual, are the envy of the timid, coldskinned person who lacks initiative-and red blood.

A nervous person is always at a disadvantage.

Coffee is a common cause of "cold hands and feet," nervous trepidity, etc.

What a delightful change it is to feel the power of warm blood and strong nerves! Stop drinking coffee for a week or ten days, and use Postum as the table beverage.

Make your Postum strong and rich-boil it 15 minutes or longer-serve piping hot with good eream, and it is delicious and wholesome, too.

Postum contains no coffee or other drugs (caffeine is the drug in coffee) but only the food elements of clean, roasted wheat and a small amount of molasses. Read "The Road to Wellville" in pkgs.

5000 Easter Booklets Passed Through Fire In Trans- 1 portation Damage Hardly

Yes, and even less than half, 5000 of these booklets, because they were in a fire on board the steamer that carried them from the publisher to us, although the damage was so slight that in most cases it effected only the outside envelope that covered the booklet. Indeed the writer examined more than a dozen of them and could find no traces of them having been through a fire, so that the prices are injured so that you buy them at less than half. Here are booklets that would sell regularly at from 10c to 25c, divided into three price lots at 2 for 5c, 5c and 10c each. Just before Easter, think of such an opportunity. Aisle 5.

42-Inch Dress Nets ...

A foremost importer found himself much overstocked on this beautiful quality of dress net. But two things were left for him to do, keep it on his shelves and perhaps later reduce the price or take a big loss at once. He decided that the latter was the best business policy. So he came to us, knowing that we would give him spot cash for the stock, and that we could handle the quantity.

So this shipment has arrived and it includes a variety of the most pleasing styles. There isn't a piece in the lot but that is worth double or more than this price. Styles for yokes, over dresses, waists, etc. Many new spring shades are represented. 42 inches wide, special price, yard, 49c.

Banquet at Levy's Gives Automobile Racing Men an Opportunity to Air Views on the Future of the Industry—Pie-pan Track Fastest in the Country, 'Tis Said.

Motordrome officials, visiting automobile drivers and local racing-car men were entertained last night at a banquet at Levy's, given by McDonald Purcell, representative for the Schebler carburetor. The spread was given in an upper room and covers were laid for sixty. F. E. Moskovics, manager for the Motordrome, was toast-

ager for the absorbance making was technical, most of the remarks was technical, most of the remarks had to do with the coming events which overshadow everything else in the automobile world. It was predictable fields. Our east but he has at such as at but he has at but he had a such as at a such as a s

the Motordrome speed trials are commenced.

Jack Prince, designer of the Motordrome, gave an interesting account of the progression of the automobile industry from the early days of the "bone-shaker" bicycle. Jack told of winning honors on many tracks in England and America. He was at one time champion bicycle rider of the world, and has held, and now owns, more medals than any other one man ever earned.

Fron. the "bone-shaker," Prince said he turned to the high-wheeled bicycles, which were an improvement. Then came the lower machines, which made fast time. These ushered in the era of the motorcycle, which hater paved the way. Prince said, for the popularity of the motor car.

When beaten by Zimmerman for the bicycle championship of the world, Prince began to build bicycle and motorcycle tracks. He later turned his attention to board tracks. He admitted last night that if he had a chance to try again he would build a notorcycle track different from the one he erected here.

The Al-Rain fell of the day at track was very have a led most of the day at track was very have led most of the day at track was very have led most of the day at track was very have led most of track which has proved a great success. This gave the idea for the present Motordrome. Prince interested Moskovics in the proposition and the two returned to Los Angeles to build the one-mile course at Playa del Rey.

Now that it has been demonstrated that the ple-pan track is the fastest automobile course in the world, Prince is happy. He is confident that all world records are to be smashed and his confidence is shared by hundreds of others, among them experts who have carefully examined the board course.

The operation of a carburetor was explained by Purcell, who gave the racing game a big boost. Four and six-cylinder motors were given special attention by the speaker, who urged the placing of two carburetors on a motor of more than four cylinders. An eight-cylinder car in town has just been fitted with two carburetors of Purcell last night are: Ray Harroun, who drove the Marmon into world honors at Ascot Park recently: Al Livingston, the Corbin driver; Prank Free, who is fitting up the old Ford '199" for the Motordrome; Frank Siecter, Bill Endecott, and others who have figured on local tracks.

[BY DIRECT WIRE TO THE TIMES ] SAN FRANCISCO, March 21 .- [Exclusive Dispatch.] Intercollegiate re-lations between Stanford and the Uni-versity of California will be severed for the balance of the year, if the recommendation made at the meeting of the Intercollegiate Agreement Com-mittee tonight by Graduate Manager Ralph Merritt of the State institution is supported by the student body at its meeting Wednesday. is supported by the student body at its meeting Wednesday.

For the sixth time since the first of the year, the representatives from the two universities gathered, at the Paiace Hotel, tonight, to adopt a rule covering the eligibility of students in varsity competition and at the end of a stormy session, lasting nearly three hours. Merritt, speaking for California, asserted the body sanctioned the elimination of further activity and should make that recommendation to the respective executive committees. Stanford opposed auch a resolution on the grounds that the Agreement Committee had no such power and was assembled purely 6 make rules. Early in the meeting, Stuart O'Melveny of the California Committee stated that the University of California faculty would not consider the proposed scholarship requirement offered by Warren Olney, the alumni delegate of the meeting for California. Olney was not present at the meeting and Stanford representatives were unable to interpret the attitude of the State University faculty a voiced by Merritt and O'Melveny.

The rule in question restricts a student to representing his college four times in any one branch of varsity sport. The California student body offered a motion whereby that time be included in four years, commencing with the date of matriculation, and that no allowance be made for time lost through fallure to be registered or otherwise.

Stanford moved that the period in which a student be allowed to compete four times in 'varsity athletics be unlimited.

After considerable argument on both sides a compromise was reached, in which a student be allowed to compete four times in 'varsity athletics be unlimited.

How can you expect comfort in an automobile that is rigid in construction?

The first thing to be sure of when you select an automobile is comfort.

Look to the springs. If you do not know what is what in springs go to a good carriage man. Study the proposition yourself. You will find that semilliptic or other form of springs cannot possibly equal full-elliptic springs. Automobile manufacturers using them do not claim that they do. They use them be-cause their plan of construction will not permit fullelliptic springs.

Comfort does not stop with springs, although the springs are the main element. There must be flexibilty, not rigidity. You know how rigid and hard-riding the lumber wagon is. You would not think of such rigid construction for a carriage. Why accept it in an automobile?

The Franklin, like the finest carriage, is flexible and easy. It has four full-elliptic springs and a wood chassis frame, the only means by which full comfort can be secured.

Los Angeles Sends Six to Panama Fair Conference.

Payor San Francisco as the the and Exposition City.

mportant Action by "M. and M." and Realty Board.

That the proposed Panama Canal Exposition for 1915 will be lost to Calfornia unless the entire State swings selidiy into line for one location, was as opinion of representative business men of San Francisco and Los Anceles at a meeting held yesterday porning in the Chamber of Commerce building. Delegates from this city who are to attend the State convention at Santa Barbera today will support the claims of San Francisco for the big World's Fair.

IRE OF MR. BURLESON. (ASSOCIATED PRESS NIGHT REPORT.)

LATE OF WASHINGTON.

[ASSOCIATED PRESS NIGHT REPORT.]
WASHINGTON, March 2L.—The published report that the Burieson resolution of last Saturday, declaring the Speakership of the House vacant, was inspired by a member of the Republican majority, was positively denied by both sides today.

Burieson was asked about it. He denied the report and demanded to know who was responsible for it.
When informed it was said to have come from Representative Tawney, Mr. Burieson called to Mr. Tawney and demanded:

[ASSOCIATED FRESS DAY REPORT.]

NEW YORK, March 21.—Urging upon mayor Gaynor and the Aldermenthe adoption of a noiseless Independence Day, Mrs. Issac Rice of the Society for the Suppression of Unnecessary Noises, says, in an open letter to day, that in the last three celebrations of the Fourth of July in New York. City more persons have been killed or injured than in seven of the famous battles of the Revolution.

"Governors of twenty-one States in the Union, and Mayors of twenty-seven of the leading cities, have consented to be members of a National Committee for the Promotion of a Safe and Sane Fourth of July," said Mrs. Rice in her letter.

"The annual list of casualties of this day reached a total of nearly 13,000. Yet Mr. Gaynor says he is touched with sympathy for the small boy who desires to shoot off the firecrackers. But with the facts before him, surely Mayor Gaynor will be able to see the other side."

Apoplexy.

(BY DIRECT WIRE TO THE TIMES.)

STOCKTON, March 21.—[Exclusive Dispatch.] The excitement of witnessing her young son riding in a right hack of a runaway horse caused Mars. Mary A. Danner to suffer a stroke of apoplexy which soon caused her death last might. She was standing in her young son riding in a right when the animal dashed by and she recognised her boy, who was in great danger of being injured, as he could not control the horse.

Mrs. Danner ran down the street in time to see the animal captured by several men and her son rescued unhurt. She returned to the family home, but on the porch fell unconscious. Physicians worked over her, but could not save her. At one times he regained consciousness for a short period, but her mind was completely blank as to the runaway incident.

Mrs. Danner-was very prominent in W.C.T.U. and church circles and there will be a large outpouring of the people at the funeral tomorrow.

Raides the widower, L. A. Danner, a well-known business man, three children, a mother and two byothers, G. W. Bottorff, of Sacramentic and William Haynes of Berkeley, survive her.

fight which it finds he has shaded the combine in the Board of Equalitation.

In this opinion of Judge Adams, which was concurred in by Judges Riner and Munger, the United States Court of Appeals finds that the taxable property in Macon county has never been assessed at its full value, as the law requires, but always at from 20 to 50 per cent. of its value.

The opinion is in the suit of Arthur Huidekoper of Meadville, Pa., to mandamus the five members of the Board of Equalization to compel them to assess property in Macon county at its full money value. Huidekoper charged a conspiracy on the part of the Board of Equalization with the county officials of Macon county to prevent him from realizing on 183,800 worth of county bonds which he holds.

The petition in the suit set forth that the assessed value of property in Macon county was \$3,278,123, while the full money value, which the law prescribes should be assessed, amounts to 250,000,000.

### TO OUST THREE COUNCILMEN

Proceedings Begun With the Attorney-General.

Allegation That They Are All Parties to Contracts.

Cases Are Similar to That of Sherman, 'Tis Said.

Attorney E. L. Hutchison states that he has started proceedings with the Attorney-General of California for the ouster of three members of the Los Angeles City Council.

After completing the formalities with the Attorney-General, as he said last evening, he will go on with proceedings in the courts, for which he has prepared the courts, for which he has prepared the complaints.

The three members are Mesers. Works, Williams and Washburn.

Attorney Huterison asserts that President Works and Councilmen Washburn and Williams are ineligible; that he has copies of the contracts and receipts between these gontlemen and the city, showing they are financially interested in contracts with the municipality, and that he has started proceedings for their disqualification with the Attorney-General of the State, and upon his indorsement of the papers suit will at once be died in the Superior Court.

FERRIS NOW CURIOUS.

Curiosity has not been a fault of Horace B. Ferris, cierk of the Board of Public Works, but that virtue does not cling to him so much now. When W. F. Bryant, a contractor, came into Perris's office y exterday, be hurriedly took a paper out of an envelope and dropped the latter on the floor. Then he filed the paper with Ferris and hurried to tunder his heel, spat on it, and offered other indignities to it. At last ke kicked it under the desk. STOLEN NAMES.

STOLEN NAMES.

A new paragraph has been added to the list of crimes that amount to high treason—or worse.

By some remarkable feat of mental gymnastics (and like various other species of the bandar-log, they are good at any kind of gymnastics) the owners and proprietors of the Lincoln-Roosevelt League have discovered that it is treason and insulting the dead to call that august aggregation the Link-Roosevers.

ters.

They have announced in a very severe tone that to call them "Link-Roosters" is to insult Theodore Roosevelt and vilify the martyred President in his grave. In other words, not to mention that funny little band of imitation politicians in the pompous terms of their own fevered imagination, is a grave offense against all the canons of patriotism and deceare.

If to be patriotic it is necessary to take the Link-Roosters at their own estimation of themselves, the case seems hopeless; there are not enough people who can hypnotize themselves. Certainly Abraham Lincoln and Roosevelt would

case seems hopeless; there are not enough people who can hypnotize themselves.

Certainly Abraham Lincoln and Roosevelt would have been beyond the pale.

Mr. Lincoln was not of renegade stock. He was the father of the Republican party. He believed in parties and in sticking to parties. From first to last he who is our highest type of American was a recognized "party man."

Roosevelt, of course, has always been an exponent and a faithful soldier in the ranks of the Republican party. Party expediency has been a familiar doctrine in the career of this remarkable pan.

The man who would deliberately sacrifice (as he then thought) his entire political future for the sake of the party as Col. Roosevelt when he accepted the nomination for the Vice-Presidency, is certainly one who could not gain admission into the sacred inclosure of the Link-Roosters.

The Link-Roosters are a good deal in the position of the soap manufacturer who names his product the Best Soap in the fond hope that this slick trick will sweep all his competitors out of the market. But like the soap man, they bump into the painful realization that there isn't that much in a name.

By the crafty device of naming themselves after Mr. Lincoln and Col. Roosevelt, they do not convince the public, to any great depth of conviction, that they have absorbed the qualities, or secured the indorsement of those men.

Sad to say, Mr. Lincoln would probably have turned them away with a funny story about a farmer and a dog, which the longer they thought about it the less they liked. Col. Roosevelt never seemed to go crany about them. When the arrangements were being made for the first Taft campaign, under the Roosevelt guidance, the Link-Roosters got such a turndown from headquarters that their collective hair stood on end.

However, there is good in everything; and the Link-Roosters have contributed not a little to the merriment of the usually sad game of politicians wish to join hands with some dilettante young millionaires who never voted before, there is no serio

right, too.

But when it comes to scolding the public for not believing they are Lincolns and Roosevelts, when they much more nearly resemble link sausages and roosters, we must raise a warning finger.

A NALYSIS OF CONGRESS.

A NALYSIS OF CONGRESS.

A Congress is the city set upon a hill which cannot be hid, and the light that is not under a bushel. Perhaps while the legislative branch of the United States government is so conspicuously in the public eye an analysis of the membership might not be uninteresting.

According to the World Almanac of the current year, when its statistics were made up the House of Representatives consisted of 225 Republicans, 169 Democrats, 1 Unionist (whatever he may stand for,) and there were three vacancies. The total membership is 398.

for,) and there were three vacancies. The total membership is 398.

Of these, 224, or considerably more than half, served in at least one previous Congress; a good many of them in several. Ten served in the Confederate army, and 22 among the Union forces.

As to vocations, 212 were lawyers, 64 are classified as public officials, 19 as bankers, 6 as editors, 3 as miners, 3 as retired, 1 was a physician, 16 were farmers, 10 manufacturers, 3 merchants, 1 (Hobson of Alabama) naval constructor, 3 were engaged in the stone business, 9 in real estate, 2

(Hobson of Alabama) naval constructor, 3 were engaged in the stone business, 9 in real estate, 2 were trustees, 1 nurseryman, 6 lumbermen, 2 inaurance agents, 1 builder, 4 publishers, 1 capitalist, 1 miller, 3 stock raisers, 1 tanner, 1 surveyor, I corporation official, 9 journalists, 1 lecturer, 1 railroad official, 2 planters, 1 mining engineer, and 3 declined to state what their business had been.

Of the total memberahip, sixty-three are 60 years old or more. Many of them are nearly 70. One hundred and fifty-two were not educated in college. The old men and the college men rather predominate in the East, and the young men and non-college men in the West. Yet both New York and Pennsylvania number a great many Representatives who are not college-bred, Pennsylvania taking the lead in numbers over all, In some of the Western States the percentage of college-bred men is very large. The same is true in some Southern States. For example, of the nine Representatives from Alabama, only one has not an educational diploma.

ploma.

In the South they take their Congressmen mostly from among native sons. Alabama has but one Congressman not born in the State, and he came from Kentucky. Arkanses has but one, and he came from Tennessee. When you get out into the West the birthplace of Congressmen is very much scattered. California has one from Massachusetts, one from Canada, one native-born (Mr. Knowland,) one-from Germany, one from Wisconsin, one from Nevada, one from Scotland and one from Iowa. The Californians are all pretty young men, McLachlan being the eldest, bogn in 1852. Of the eight California Congressmen, three have a college education. It may be interesting to note that Congressman Hayes, our single California "insurgent," was born and educated in Wisconsin, a graduate of the University of Wisconsin, the home of "insurgents."

the University of Wisconsin, the home of "insurgents."

Georgia has but one Congressman not born in the State, and he came from Louisiana. Illinois Congressmen come from very many parts of the world, about half of them being of native birth. Indiana is one of the States which believes in native sons, having twelve Hoosiers in its delegation and one from Ohio. Kentucky went outside of the dark and bloody ground for but one man, and he came from Iowa. The Maine delegation is solid of native sons. So is that of Maryland. Massachusetts took one from Maine, one from Pennsylvania, one from New Hampshira, one from Illinois and one from Rhode Island. Mississippi took two outsiders out of eight, one from Florida, the other from Alahama. The New York delegation is mostly of native birth. North Carolina went to Alahama for

cne Congressman. The Ohio delegation is pretty solid in native sons, too. Vermont and Virginia again have solid native-born delegations, and Tennessee out of ten went outside but for three, two coming from Virginia and one from Alabama.

The "insurgents" are for the most part young men, and a majority of them have had a college education.

The "insurgents" are for the most part young men, and a majority of them have had a college education.

The oldest Representative in Congress is Sperry of Connecticut, who was born in 1827. The young-cest is Edwards of Georgia, born in 1878.

When we come to the Senate, of the total membership, fifty-eight are Republicans (including the "insurgents") and thirty-four Democrats. Of these, ten were Confederate soldiers and nine were in the Union army. Thirty-one Senators did not go through college. Thirty-six of them are 80 years old or more, ten of them are 70 or better. Three Senators are of English birth, one Norwegian, one Irish and two Canadian. A Canadian, Isaac Stephenson of Wisconsin, is the oldest member of the Senate, being 80 years old; and the blind Senator from Oklahoma, Thomas P. Gore, is the youngest, only 39. The States whose Senators are both native born are Connecticut, Delawars, Georgia, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Mississippi, New York, North Carolina, Ohio, South Carolina, Tennessee, Vermont and Virginia. California went to Maine for one Senator, Perkins, and to Massachusetts for Flint. Nebraska has two lowans as her representatives in the Senate, and West Virginia has two Ohioans. Both of them served in the Union army.

The business of the Senators is analyzed as follows: Lawyers 50, farmers 3, manufacturers 2, miners 2, editors 1, insurance 2, stock raiser 1, bankers 5, diterature 1, humber 1, newspaper publisher 1, corporation official 1, trustee 1, public officials 5, lumbermen 2, canning 1, restired 2.

Members of the House of Representatives get a salary of \$7500, and the Senators the same. The Speaker of the House has a salary of \$12,000 a year.

CTATE CONTROL OF UTILITIES.

The State of New York is moving toward the formulation of laws by which the State government shall exercise more control over the telephone companies operating in the commonwealth.

This is a different thing from State ownership, and it is also just as different from government control over all kinds of corporations. It shows discrimination on the part of the statesmen of the Empire State. We hope the day is far, far off when the government, of the United States shall become a railroader, a manufacturer, a farmer or a banker, or enter into competition with the citizens of the country in any form of business. We hope it is as far away when crude socialism shall triumph in our lawmaking and the government shall become an unnecessary intermeddler in the business of the people. We say "unnecessary" with due consideration.

Telephone companies, telegraph companies and common carriers are different from ordinary corporations. In the first place, their charter is two-fold. It gives them a right to be, and it also gives them privileges by which they may do. Rights of way are very valuable gifts. All highways and nav-gable streams belong to all the people, and when a corporation is permitted to use these there should be some compensation to the public who grant the privileges. As population thickens in this country the profits of operating such utilities become very much larger. The ability of the company to favor the public is increased, and the rights of these kinds are in a way necessary, if not to all the people, to most of the people. They become to business like air and water to the individual. The equities are legitimate subjects of inquiry on the part of the States and of the nation.

There may come a time (see do not say it is

There may come a time (we do not say it is here yet, nor near here) when it will be for the lest interests of all the people that the Federal government shall take over the control and management of telegraph companies and when States may properly do the same in regard to telephone companies. This has been the case with the post-office. Of course we do not concede for a minute that in a country like ours, where the people are the lawmakers, and therefore the government, a corporation might not be organized under modern conditions and under government control which would manage the postoffice business in all its departments quite as successfully as the government does it. Because it was necessary generations ago There may come a time (we do not say it

for the English government to take the carrying of letters away from a private monopoly, and because all civilized nations have followed this example so good in its day, is not an unanswerable argument for the perpetuation of this policy forever, and most assuredly it is no argument for the extension of the policy in a general way.

These are all subjects comparatively new to the people. They are subjects which the public press should discuss with intelligence and with fairness. Unfortunately they are subjects which have been left too much to the exploitation of the muck-rakers. These some through ignorance, more through malice presents, mislead the people, one blindly, the other deliberately. It is the duty of the untrammeled press, not afraid to do its duty by the people, to present these cases, giving all the facts fairly and discussing them in a spirit of reasonableness and fairness, not for the sake of the corporations, but for the sake of the people themselves. The public interest is paramount in all cases, but it is not the uppermost thought in the mind of the demagogue.

NO TARIFF WAR WITH CANADA.

MINIOTARIFF WAR WITH CANADA.

It is earnestly to be hoped that the President will be able to prevent a tariff war between this country and Canada, or, more properly speaking. British North America. The business done between the two countries is too large to justify such a suicidal policy. Of course if the war comes it will be of Canada's declaring and making, and not of ours. Tariff wars, like real wars, must be made upon the United States first. We never go into such a struggle until it is forced upon us.

In the fiscal year which closed June 30, 1909, we imported from Canada merchandise valued at \$79,317,055, and we exported to the Dominion merchandise of the value of \$163,448,656. Here we have a combined international commerce between the two countries amounting to almost a quarter of a billion dollars.

In imports we do vastly more business with Can-

rts we do vastly more busine

In imports we do vastly more business with Canada than any other nation excepting the British empire; and cur exports to Canada are more than
twice as much as those from all the British empire.
We only buy from Canada such things as we
need and cannot produce at home as cheaply as we
can buy there. Moreover, they are such things as
do not enter too closely into competition with home
products and thus take the home market from home
producers. Certainly Canada buys from us nothing
easily possible to produce at home (in Canada) at
the same price as bought from us. Both countries
are protective in their policies, and so honors are
easy on that score.

In the old days when there was one tariff levied
upon each commodity alike from all countries, it
was easy sailing. Our modern system of commercial treaties, with compensating advantages between certain countries, has made the tariff problem much more difficult to handle between the nations. It is necessary to have these commercial
treaties, but the less discrimination we make the
better.

There is another fact in this conflict helwares us

treaties, but the less discrimination we make the better.

There is another fact in this conflict between us and Canada that abould beget reason in the minds of the advocates of too much revision downward. When the clamor was made for free paper pulp and pulp logs we pointed out the danger of Canada slapping an export tariff on these commodities coming into the United States, and that is exactly what has happened. A great deal of this pulp and of these pulp logs come from crown lands in Canada, and the Canadian government, finding they are not taxed so heavily as before on such imports into the United States, proposes to double their advantage by exacting an export tax. So they "catch us coming and catch us going," like the darky with the possum.

The purpose in the mind of the Canadian row.

possum.

The purpose in the mind of the Canadian government may not be to overreach us. It is possible, as The Times said last spring when discussing this very subject, that the danger of depleting their woodlands by heavy exports of this kind of timber to the United States may have suggested that something was necessary to prevent this from taking place.

# Vore new suitings

Among last week's receipts of Spring suitings were the new Homespun Carde in gray, tan, black, cream and lavender, 46 and 48-inch widths, at \$2.25 and \$2.50 a yard. These are, without exception, the richest and most generally satisfactory fabrics at anywhere those prices imported this season.

Another shipment of the ever popular cream ground suit-ngs, 44 to 56-inch widths, \$1.25 to \$2.75 a yard.

The present demand is so unusually heavy that a short arket before the season is far advanced is almost a certainty.

Buy right now, we are showing the most complete assort-nt of cream wool fabrics we have ever had.

Particularly strong on the serge, carde, cheviot and Pana-weaves. \$1 to \$3.50 a yard; 42 to 56 inch widths.

54-inch English cheviots in handsome shades of lavender, de, gray, tan and blue—strictly tailor weight—\$2.50 a yard.

## Rare value in braid combs

Several new designs in braid combs made of real tortoise shell—no imitation about them—at five dollars each.

# \$7.50 to \$10.00 ch Petticoats

Even after yesterday's furious selling there is a tremendous variety of silk petticoats of the \$7.50 to \$10 grades left for today's business at \$5 each—there were over twelve hundred when the sale started, yesterday morning, remember.

Pompadour Silks, Shepherd Checks, Roman Stripes, Changeable Taffetas, Jersey Tops with Taffeta or Messaline Flounces, Taffetas in dainty blue-and-white, lavender-and-white, gray-and-white and tan-and-white stripes—an almost endless variety.

# he right wash goods

This stock will meet your requirements, whether the need is for the most costly imported fabrics in single-pattern lengths or the inexpensive domestic weaves.

27-inch "Pervanco"-an imitation of the immensely popular 54-inch Automobile linen in natural shade, \$1.25 a yard.

nave been a "chicken farm."

The windows are hung with bright red, the Chantecler color, and several Chantecler hats, just in from Paris, are on exhibition. In one corner a giant cock with bright red feathers stands watch over a large picture of Rostand, the author of "Chantecler" the most widely advertised play ever produced.

French women are now wearing the Chantecler hat, but whether it will "take" in Lea Angeles is not certain. The hat itself without the trimming would not attract much attention, consisting as it does, of a plain straw shape. On top of the shape perches a very life-like chicken, owl or turkey, as the case may be. The bird is made from natural feathers, and is usually of a bright red.

NOONDAY SERVICES.

The first of the series of noonday religious services during Holy Week at the Board of Trade rooms was held resterday at noon. In the absence of Bishop Johnson Dr. Leslie Learned lead the services and the Rew. W. C. Hull, pastor of the Christian Church preached a short sermon. Dr. Learned stated that the purpose of the series of meetings is to give the business men an opportunity to attend short religious services during Holy Week. "We come together as Christian Church, preached a short sermon. tian churches of the city," said Dr. Learned. "It is this unity of purpose and unity of action that makes these meetings may prove interesting and helpful to all."

TO BUY CITY LIGHT.

To BUY CITY LIGHT.

The Chamber of Commerce of South Pasadena has announced through P. J. Doian, chairman of the Lighting Committee, that electricity will be procured from the municipal lighting plant of Pasadena for lighting the streets of South Pasadena. One of the principal issues in the present municipal campaign in South Pasadena is a fight on the Pacific Light and Power Company, which the candidates, bucked by the Chamber of Commerce, contend is charging too much for street lighting. South Pasadena is a paying at the present time 7 cents per kilowatt for street lighting, while Pasadena, with its municipal plant, is paying but 3 cents.

Mayor Earley states that Pasadena at the present time can well afford to supply South Pasadena at 3 cents per kilowatt and still make money; but on account of the increasing consumption in Pasadena due to the large numbers of new consumers which the municipal plant is signing up every week, it is doubtful if a contract will be made with South Pasadena the capacity of the Pasadena plant will have to be increased. Mayor Earley stated that South Pasadena had made no overtures lately, but that in case application is made something might be done whereby South Pasadena can have the benefit of a low rate.

GLENDALE, March 21.—The work of converting the McCann and Ken-nedy ranches, purchased early last of converting the McCann and Kennedy ranches, purchased early last summer by John Brockman, a Los Angeles mining man, into a magnificent country home, has been in progress for nearly a year. The large and artistic mansion of cement, built upon a spur of the foothills where it commands a view of the entire San Fernando Valley, is now ready for occupancy. A roomy bungalow for the landscape gardener has been erected. A greenhouse built in the cafion supplies many plants used in beautifying the grounds. A tunnel has been driven 200 feet into the mountain, where a little spring exists, and a generous supply of water developed. Hundreds of palms and other decorative and shade trees have been planted along the winding drives and walks. A grove of eucalysts of a decorative variety has been set out upon one of the lower foothills. During the past week about three acres have been set to Valencias and Washington navel oranges. Several acres of foothill land has been inclosed for a deer park and a carioad of deer is expected daily.

UPLAND, March 21.—B. P. Buck, a young Englishman, employed here for several months by the water company, is wanted on a charge of rape, said to have been committed against Almira Sprowl. It years old, who recently arrived from the East.

It is alleged that the girl went to the tent-house where Buck lived to borrow a bleyele. While in the tent with Buck, the cries of the girl attracted the attention of some of the hearer neighbors. They questioned her and she asserted that Buck had taken undue liberties with her. By this time, quite a crowd of men and women had arrived on the scene, and Buck came forth from his tent. He was asked as to the URth of the charges the girl made against him, and he emphatically denied all. The girl stuck to her story, and a call was sent for Marshal Sawyer. Buck said he would face the Marshal, or any one else.

Advance in Price is Certain

Your money will be safely invested—will earn good interest at once—steadily increasing interest—and the principal will double in a very short time. We believe that long before the properties are fully developed your money, invested in the shares NOW, will return you in dividends EACH YEAR an amount equal to the original investment.

A few years ago, it was doubted if oil existed in paying quantities in certain fields where traces of oil were being found. This was true of parts of the Midway field where now great gushers are pouring forth thous-ands of barrels of oil daily; where the value of the land has increased almost fabulously.

Indications point to the same conditions in the Devils Den District, where the Section Six Oil Company owns outright 440 acres of land. Oil is being found there, and new companies are being formed to develop that district. It is almost needless for us to point out to you that there is every likelihood of this 440 acres proving enormously valuable.

An important point in connection with investment in Section Six shares is that approxi-mately ALL its earnings are applicable to dividends. The company is most economically conducted and is under practically no expense. This means a gread deal to the conservative investor, for it means the maximum of profit on

It means that dividends will increase faster than if only a portion of the earnings could be used for that purpose, and the value of the shares will advance proportionately.

When you invest in Section Six you become When you invest in Section Six you become an owner in a dividend paying company that has only just entered upon its earning and dividend paying career. A company with great and valuable holdings and a great future. Compare its small capitalization and large holdings with any company you wish and you will readily see why Section Six is regarded as such a good investment—why it will prove a profitable one for YOU.

Stockholders of United Come Pack Jubilant.

A party of twenty-six Los Angeles most of whom are stockholders to United and Midway Central in the United and Midway Central Oil Companies, returned yesterday morning from a visit to the Midway off fields. The party was headed by A. B. Cohn, who is largely interested in the above properties. The main object of the trip was to inspect the property of the United Oil Company, but the members took occasion to view the Lakeview and Mays gushers, about which so much has been said recently. Mr. Cohn brought back photographs

ment of the prospect were about to be concluded.

In the vicinity of the oil sand and on the side of the hill nearer the ocean and overlooking Russell flats, where the Santa Monica Oil and Gas Company has been drilling for several months, the drills have reached a depth of 1250 feet. The indications of striking oil in that hole are good. The well received a bad start, as the drills struck boulders and the hole was crooked. This defect had to be eliminated and much time was lost in straightening the hole. Rapid progress has been made since the error was overcome, and the drillers are hopeful that the next few hundred feet will bring oil too the surface. The indications grow-better as depth is attained. This is the first well in that vicinity and the company sinking it was promoted by Lucky Baldwin.

# Exquisite Silk Dresses at \$40

News of Smart Easter Styles at Small Cost

A feature price in our gown room. That means it's an item on which we have spent unusual energy—one on which we quote a price you'll appreciate as rock-bottom. Not one style at \$40, but many styles, of many materials, made up after many charming patterns. You'll find cashmere de soie, handsome twilled foulards, crepe de chine and beautiful taffeta in street and evening shades. Models bordering on the plain tailored effect, as well as novelty trimmed garments. All new, pretty and just the proper thing for Easter.

At \$25 we show a very choice assortment of taffeta, foulard and messaline silk dresses. Many with accordion plaiting tunic overskirts; or straight plaiting—three of the latest style touches. Some are splendid copies of many higher priced gowns.

# Exceptional Values

At \$25, any one of these 100 coats would be moderately priced. See them. There are handsome black, navy and colored serge coats, semi or full fitted. Some plainly tailored, others with touches of trimming. Also pongee, Tussah silk and black taffeta coats, so much in demand for Spring and Summer. There's a style for every fancy. All are 52 inches long, and we have all sizes. This is another big leader of the day.
